

手釣り

Raiglon hand fishing line
superior in the flexibility
and in the durability

GOLD TOA

The choice of a fishing line for hand fishing line.

Full of flexibility and operability is good and does not take twist. A hand fishing line that is superior in the durability and strong in friction by surface processing.

FISHINGLINE

RAIGLON®

Challenge!

RAIGLON® FISHING LINE

Raiglon begins a challenge to the next era at high quality, a high performance fishing line. The limitless performance & possibility that the technical concentration produces.

Raiglon Lines led a supreme proposition to the real thing by advanced technology. In fishing scene to change every moment, the line where we hid the best potential of Raiglon enables the select more and continues making the new legend in a new century.

ハリス

The strongest Leader Line in the next generation when original processing technique produces it.

Ultimate abrasion resistance and tenacity – 100% Fluorocarbon

APACHE

Apache is made of 100% Fluorocarbon which offers ultimate abrasion resistance and no water absorption for long life while retaining its natural refractive qualities, making it virtually invisible under water. 1.78 specific gravity which is relatively higher than that of Nylon (1.14)/Polyester (1.38) provides greater sinking performance. Thinner compact spool is easy to store.

Super strength Leader Line that excels others in all.

EXCEED SAMURAI FOR PROFESSIONAL TOURNAMENT USE

By making new developed T.E.C. processing on abrasion resistance, high strength fluorocarbon, it creates the strong thin, low expansion and contraction, high friction resistance, root gap and curl prevention at a high level. It is improved pulling tension strength largely by using highly precise yarn technology and carefully selected fluorocarbon material. Super strength Leader line that excels others in all.

Specific Gravity 1.79, Refractive index 1.42, No water absorption. Soft tension spool.

High quality Shock Leader specially developed for easy tie up with line

ACROBAT SHOCK LEADER

Acrobat Shock Leader is specially developed and made of high tenacity abrasion resistant material added IWS process and Soft process (Patent No. 3142956). It is specially developed for easy tie up with line. Individual design for each size.

All round high quality line exclusively designed for Hera fishing

RAIGLON HERA KYOKUTENSUI MICHIIITO

Raiglon Hera Kyokutensui is made of high tenacity nylon and added newly developed hydrophilic special resin for greater sinking performance. Raiglon Hera Kyokutensui is specially designed for Hera fishing needed appropriate stiffness and suppleness fit in any size of rod. Selected visible color in reflection and wound in a bobbin softly for a maintenance of its high quality longer. Individual design for each size.

Nylon

ROYAL VIOLET

All round high quality Harisu exclusively designed for Hera fishing

RAIGLON HERA KYOKUTENSUI HARISU

Raiglon Hera Kyokutensui is made of high tenacity Harisu nylon and added newly developed hydrophilic special resin for greater abrasion resistance and memory of straightness without tangle up. Virtually invisible smoke natural color improves Hera fishing and its suppleness is easy to tie up with line. Individual design for each size.

Size	1.8	2	2.5	3	3.5	4	5	6		
Diameter(mm)	0.220	0.235	0.260	0.285	0.310	0.330	0.370	0.405		

A Super Strength fishing line of the trust

RAIGLON STAMINA

A super strength fishing line with strength at the same level as Leader line. High Quality, Low Price.

■150m						
Size	2	2.5	3	4	5	6
Diameter(mm)	0.235	0.260	0.285	0.330	0.370	0.405

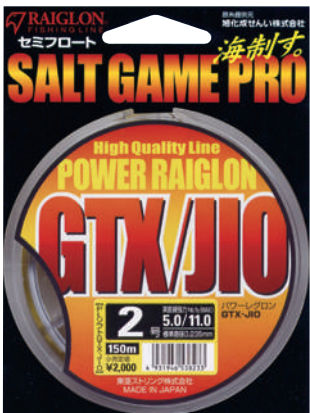

High Abrasion Resistance Performance

SYBER ISO

By comparison with normal fishing line, about 20 times (our company data) improved an abrasion resistant performance.

■150m										
Size	1.5	1.75	2	2.5	3	3.5	4	5	6	
Diameter(mm)	0.205	0.220	0.235	0.260	0.285	0.310	0.330	0.370	0.405	

The strong line which has the best potential of RAIGLON. Suitable for all types of fishing.

POWER RAIGLON GTX-JIO

Super high quality leader fishing line which had four good points such as "less sticky", "less coil memory", "softness", "strong" by adopting super water-repellent waterproofing strong resin process and soft process. For a moderate elongation design, provide less shock breakage and precise hooking. There is confidence with wear resistance and high strength.

Size	1.5	1.75	2	2.5	2.75	3	4	5	6
Diameter(mm)	0.205	0.220	0.235	0.260	0.274	0.285	0.330	0.370	0.405

RAIGLON SOFT LEO POWER DRAGON

Super Water-Repellent and Soft Processing. The Strong Fishing Line which has less twist.

RAIGLON SOFT LEO POWER DRAGON

By putting strong super water-repellent water proofing resin processing and our original soft processing (Patent No. 3142956), these lines become super high quality fishing lines which have four good points such as "less tackiness", "less coil memory", "soft" and "strong". Good line operation, natural operation of bait and precise hooking with a little running out of shock due to proper elongation adjustment. There is confidence with abrasion-resistance and strength.

■150m							
Size	1.8	2	2.5	3	4	5	6
Diameter(mm)	0.220	0.235	0.260	0.285	0.330	0.370	0.405

Strong for curl and twist and pulling strength is good. Line for exclusive use of a long cast & the basket fishing.

ARES ENTOU ISO

By using the original special resin processing, drumstick water processing and soft processing (Patent No. 3142956) to high strength line, it creates "less twist", "less curl", "less coil memory" and strong for a root gap. A line for exclusive use of the big game aim that is superior particularly in pulling strength.

■200m												
Size	3	3.5	4	5	6	7	8	10	12	14

RAIGLON SOFT LEO MOZART

RAIGLON SOFT LEO MOZART

WHITE	YELLOW	WHITE	PINK	WHITE	

Three colors of marker high visibility lines. Good float performance.

LEOINA 66 MEGA FLOAT

Super water-repellent waterproofing resin processing. The float line which pursued the ease of usability (Patent No. 3142956) of "Softness", "handling of line operation is smooth by water repellent processing", "high visibility performance by the marker", "not float too much", "not sinking" by making an air chamber not sake in the float inclination to improve float performance. Due to hollow line, the tensile strength becomes 10-13% lower than that of strong line.

■150m:Size 2-6 ■200m:Size 3-10
